New York, March 2.—Prices of stocks to-day to the highest level yet touched from the recovery from the severe decline which set in after the first of the year. An observable interest has been shown in the market, the buying thus necessitated was an important factor in lifting prices. Buys orders designed to stop losses on the short side were encountered in large volume in the course of the day's advance.

The movement owed its effectiveness to the small offerings of stocks for sale. In United States Steel particularly there were signs of organized selling, which gave rise to the belief that the market price of stock had resumed operations on the long side. It was taken as a sign of such activity that there should be a revival of rumors of a new attempt to list the shares on the Paris exchange.

A quieting of anxiety over a possible trade recession is perceptible in a similar way. The improvement reported in the steel trade is responsible largely for this better feeling. The steps taken by the railroad corporations to raise heavy capital with a view to going forward with improvements and betterments form an element in this feeling of encouragement. Even the per centage of stocks on call, a measure of anxiety, is a sign of the market's recovery.

Discount rates eased in London, but hardened in Berlin. Foreign exchange rose again and offerings of funds to lend on time diminished in strength, ending at record interest rates. There was little pressure to sell at concessions at any time, even when the demand dropped down late in the day.

Bonds were strong. Total sales, value \$1,565,000. United States bonds were unchanged on call.

Total sales of stocks to-day were \$53,800 shares.
